

## Period #6: Accelerating Global Change and Realignment, c. 1900 C.E. - Present

### Key Concepts - Study Guide

*Note: the question “numbers” are my own customization, and do NOT reflect official College Board designation.*

Key Concept 6.1 Science and the Environment	Answer Concepts & Relevant Factual Examples in <u>Underline</u>	“Factoids”
<p>6.1 How did <u>science</u> affect humans’ conception of the <u>natural world</u> in the 20th century?</p> <p>6.1.I What <u>new scientific technologies</u> developed in the 20th century?</p> <p>6.1.I.A What <u>new technologies</u> and discoveries affected <u>communication, transportation, and conceptions</u> of the world?</p> <p>6.1.I.C How did <u>scientific discoveries</u> affect humans’ <u>ability to feed and care</u> for themselves?</p> <p>6.1.I.E What <u>new energy technologies</u> affected the 20th century?</p>	<p>Rapid advances in science altered understandings of the universe and the natural world and led to the development of new technologies. These changes enabled unprecedented population growth, which altered how humans interacted with the environment and threatened delicate ecological balances at local, regional and global levels.</p> <p>Researchers made rapid advances in science that spread throughout the world, assisted by the development of new technology. New modes of communication and transportation virtually eliminated the problem of geographic distance. New scientific paradigms transformed human understandings of the world. (such the <u>theory of relativity</u>, <u>quantum mechanics</u>, the <u>Big Bang theory</u> or <u>psychology</u>) The <u>Green Revolution</u> produced food for the earth’s growing population as it spread chemically and genetically enhanced forms of agriculture. <u>Medical innovations</u> (such as the <u>polio vaccine</u>, <u>antibiotics</u>, and the artificial heart) increased the ability of humans to survive. Energy technologies including the use of <u>oil</u> and <u>nuclear power</u> raised productivity and increased the production of material goods.</p>	
<p>6.1.II How did humans’ <u>relationship to the environment</u> change in the 20th century?</p> <p>6.1.II.A What negative consequences in the 20<sup>th</sup> century accompanied the benefits of industrialization?</p>	<p>As the global population expanded at an unprecedented rate, humans fundamentally changed their relationship with the environment. Humans exploited and competed over the earth’s finite resources more intensely than ever before in human history.</p> <p><u>Global warming</u> was a major consequence of the release of <u>greenhouse gases</u> and other pollutants into the atmosphere. Pollution threatened the world’s supply of water and clean air. <u>Deforestation</u> and <u>desertification</u> were continued consequences of the human impact on the environment. Rates of extinction of other species accelerated sharply.</p>	

**Period #6: Accelerating Global Change and Realignment, c. 1900 C.E. - Present**  
**Key Concepts - Study Guide**

<p>6.1.III What caused some of the major <u>demographic changes</u> in the 20th century?</p> <p>6.1.III.A What <u>diseases</u> associated with <u>poverty</u> were common in the 20th century?</p> <p>6.1.III.B How did the invention of reliable <u>birth control</u> affect <u>gender roles</u>?</p> <p>6.1.III.C How did new <u>military technology</u> affect wartime casualties?</p>	<p>Disease, scientific innovations, and conflict led to demographic shifts. Diseases associated with <u>poverty</u> (such as <u>malaria</u>, <u>tuberculosis</u>, or <u>cholera</u>) persisted, while other diseases (such as <u>1919 influenza epidemic</u>, <u>ebola</u> or <u>HIV/AIDS</u>) emerged as new epidemics and threats to human survival. In addition, changing lifestyles and increased longevity led to higher incidence of certain diseases. (such as <u>diabetes</u>, <u>heart disease</u> and <u>Alzheimer's disease</u>)</p> <p>More effective forms of <u>birth control</u> gave women greater control over fertility and transformed sexual practices. Improved military technology (such as tanks, airplanes or the <u>Atomic Bomb</u>) and new tactics (such as <u>trench warfare</u> or <u>firebombing</u>) led to increased levels of wartime casualties. (such as <u>Nanjing</u>, <u>Dresden</u> or <u>Hiroshima</u>)</p>

<p><b>Key Concept 6.2 Global Conflicts and their Consequences</b></p>	<p align="center"><b>Answer</b>          Concepts &amp; Relevant Factual Examples in <u>Underline</u></p>	<p align="center"><b>“Factoids”</b></p>
---	---	---

**Period #6: Accelerating Global Change and Realignments, c. 1900 C.E. - Present**  
**Key Concepts - Study Guide**

<p>6.2.I How has the world’s political order developed since the early 1900s?</p> <p>6.2.I.A <u>Why</u> did older, land-based empires <u>decline</u> and/or <u>collapse</u>?</p> <p>6.2.I.B By what <u>means</u> did imperial colonies <u>achieve independence</u>?</p>	<p>At the beginning of the twentieth century, a European-dominated global political order existed, which also included the United States, Russia and Japan. Over the course of the century, peoples and states around the world challenged this order in ways that sought to redistribute power within the existing order and restructure empires, while those people and states in power attempted to maintain the status quo. Other peoples and states sought to overturn the political order itself. These challenges to and attempts to maintain the political order manifested themselves in an unprecedented level of conflict with high human casualties. In the context of these conflicts, many regimes in both older and newer states struggled with maintaining political stability and were challenged by internal and external factors, including ethnic and religious conflicts, secessionist movements, territorial partitions, economic dependency and the legacies of colonialism. Europe dominated the global political order at the beginning of the century, but both land-based and transoceanic empires gave way to new forms of transregional political organization by the century’s end.</p> <p>The older land-based <u>Ottoman, Russian or the Qing empires collapsed</u> due to a combination of internal and external factors. (such as economic hardship, political and social discontent, technological stagnation or military defeat)</p> <p>Some colonies <u>negotiated</u> their independence. (such as India and the Gold Coast from the British empire) Some colonies achieved independence through <u>armed struggle</u>. (such as Algeria and Vietnam from the French empire or Angola from the Portuguese empire)</p>

**Key Concepts - Study Guide**

<p>6.2.II What <u>new movements</u> challenged the <i>status quo</i> during the age of imperial rule?</p> <p>6.2.II.A Who helped lead and define these movements?</p> <p>6.2.II.C What <u>new identities</u> were used to <u>unite populations</u> spread across national borders?</p> <p>6.2.II.D What <u>ideologies</u> were often used to “undo” imperialism?</p> <p>6.2.III How were <u>colonial peoples</u> affected by the change of old <u>colonial boundaries</u>?</p> <p>6.2.II.B How were <u>relationships between imperial powers and former colonies</u> maintained after the end of those empires?</p> <p>6.2.II.C What circumstances contributed to <u>genocide</u> and <u>mass refugee</u> populations?</p>	<p>Emerging ideologies of anti-imperialism contributed to the dissolution of empires and the restructuring of states. Nationalist leaders (such as <u>Mohandas Gandhi</u>, <u>Ho Chi Minh</u> or <u>Kwame Nkrumah</u>) in Asia and Africa challenged imperial rule. Regional, religious, and ethnic movements challenged both colonial rule and inherited imperial boundaries (such as <u>Muhammad Ali Jinnah</u>, the <u>Quebecois</u> separatist movement or the <u>Biafra</u> secession movement)</p> <p><u>Transnational movements</u> sought to unite people across national boundaries. (such as <u>communism</u>, <u>pan-Arabism</u> or <u>pan-Africanism</u>) Movements to redistribute land and resources developed within states in Africa, Asia, and Latin America, sometimes advocating communism and socialism.</p> <p>The redrawing of old colonial boundaries led to population resettlements. (such as the <u>Indian/Pakistan partition</u>, the <u>Zionist Jewish settlement of Palestine</u> or the division of the Middle East into <u>mandatory states</u>) The migration of former colonial subjects to imperial metropolises (such as South Asians to Britain, Algerians to France or Filipinos to United States) maintained cultural and economic ties between colony and metropole even after the dissolution of empires.</p> <p>The proliferation of conflicts led to various forms of <u>ethnic violence</u> (such as <u>Armenia</u>, the <u>Holocaust</u>, <u>Cambodia</u> and <u>Rwanda</u>) and the <u>displacement</u> of people resulting in refugee populations. (such as <u>Palestinians</u> or <u>Darfurians</u>)</p>

**Key Concepts - Study Guide**

<p>6.2.IV How did the <u>World Wars</u> affect the <u>nature of war and the relationship of the government to their populations</u>?</p>	<p>The varied sources of global conflict in the first half of the century included: imperialist expansion by European powers and Japan, competition for resources, ethnic conflict, great power rivalries between Great Britain and Germany, nationalist ideologies and the economic crisis engendered by the Great Depression.</p>	
<p>6.2.IV.B What <u>ideologies</u> motivated the World War conflicts?</p>	<p>The First and Second World Wars were the first “<u>total wars</u>.” Governments used ideologies, including fascism, nationalism and communism, to mobilize all of their state’s resources, including peoples and resources both in the home countries and the colonies or former colonies. (such as the Gurkha soldiers in India or the ANZAC troops in Australia) Governments also used a variety of strategies to mobilize these populations, including political speeches, art, media and intensified forms of nationalism.</p>	
<p>6.2.IV.C How did the world’s <u>balance of power</u> change during the Cold War?</p>	<p>The global balance of economic and political power shifted after the end of the Second World War and rapidly evolved into the Cold War. The United States and Soviet Union emerged as <u>superpowers</u> which led to ideological struggles between capitalism and communism throughout the globe.</p>	
<p>6.2.IV.D What were the Cold War’s <u>military consequences</u>?</p>	<p>The Cold War produced new <u>military alliances</u>, including <u>NATO</u> and the <u>Warsaw Pact</u> and promoted <u>proxy wars</u> in Latin America, Africa and Asia.</p>	
<p>6.2.IV.E What caused the Cold War to <u>end</u>?</p>	<p>The <u>dissolution of the Soviet Union</u> effectively ended the Cold War.</p>

**Key Concepts - Study Guide**

<p>6.2.V How did various <u>reactions to the violence</u> of the 20th century compare?</p> <p>6.2.V.A How did the <u>anti-war &amp; non-violence movements</u> respond to the century's many wars?</p> <p>6.2.V.B What <u>alternatives were offered</u> to the economic, political, and social status quo?</p> <p>6.2.V.C How did <u>reactions by governments and militaries</u> affect the degree of conflict during the 20th century?</p> <p>6.2.V.D Why did some movements use <u>terrorism</u> for political purposes?</p> <p>6.2.V.E How was <u>popular culture</u> affected by the global conflicts?</p>	<p>Although conflict dominated much of the twentieth century, many individuals and groups—including states—opposed this trend. Some individuals and groups, however, intensified the conflicts.</p> <p>Groups and individuals opposed and promoted alternatives to the existing economic, political and social orders (such as the <u>non-aligned movement</u> which presented an alternative political bloc to the Cold War, the <u>Tiananmen Square</u> protests that promoted democracy in China, the <u>Anti-Apartheid Movement</u> or the <u>global uprisings of 1968</u>)</p> <p>Groups and individuals challenged the many wars of the century (such as <u>Picasso's Guernica</u>, the anti-nuclear movement during the Cold War or Thich Quang Duc's <u>self-immolation</u>) and some promoted the practice of nonviolence (such as <u>Tolstoy</u>, <u>Gandhi</u> or <u>Martin Luther King</u>) as a way to bring about political change.</p> <p>Militaries and militarized states often responded to the proliferation of conflicts in ways that further intensified conflict. (such as the promotion of <u>military dictatorship</u> in Chile, Spain, and Uganda, the United States promotion of a <u>New World Order</u> after the Cold War or the build up of the "<u>military-industrial complex</u>" and arms trading) More movements used violence against civilians to achieve political aims. (such as the <u>IRA</u>, <u>ETA</u>, and <u>Al-Qaeda</u>)</p> <p>Global conflicts had a profound influence on popular culture. (such as Dada, James Bond, Socialist Realism or video games)</p>

**Key Concepts - Study Guide**

<p>6.3 What <u>new governmental institutions</u> emerged as a result of the 20th century conflicts? What made these new institutions possible? What role did they play in the world during the 20th century?</p> <p>6.3.I How did <u>states respond</u> to the 20th century's <u>economic</u> challenges?</p> <p>6.3.I.B How did the <u>Great Depression</u> affect governments' relationship to the(ir) economy?</p>	<p>The twentieth century witnessed a great deal of warfare and the collapse of the global economy in the 1930s. In response to these challenges, the role of the state in the domestic economy fluctuated new institutions of global governance emerged and continued to develop throughout the century. Scientific breakthroughs, new technologies, increasing levels of integration, changing relationship between humans and the environment and the frequency of political conflict all contributed to global developments in which people crafted new understandings of society, culture, and historical interpretations. These new understandings often manifested themselves in and were reinforced by new forms of cultural production. Institutions of global governance both shaped and adapted to these social conditions.</p> <p>States responded in a variety of ways to the economic challenges of the twentieth century. In the Communist states of the Soviet Union and China, governments directed the national economies and oversaw the development of industry. (such as the <u>Five Year Plans</u> or the <u>Great Leap Forward</u>)</p> <p>At the beginning of the century in the United States and parts of Europe, governments played a <u>minimal</u> role in the national economy. With the onset of the Great Depression, governments began to take a more <u>active</u> role in the economy. (such as the <u>New Deal</u> or the <u>Fascist corporatist economy</u>)</p>

**Period #6: Accelerating Global Change and Realignments, c. 1900 C.E. - Present**  
**Key Concepts - Study Guide**

<p>6.3.II How did new <u>international organizations</u> affect the <u>relationship of states and peoples</u> around the world?</p> <p>6.3.II.B What were the <u>economic effects</u> of new <u>international organizations</u>?</p> <p>6.3.II.C What were the <u>humanitarian effects</u> of new international organizations?</p> <p>6.3.II.D How did <u>international trade and commerce</u> develop in the 20th century?</p> <p>6.3.II.E How did these economic develop- ments affect the <u>distribution of world resources</u>?</p>	<p>In newly independent states after World War II, governments often took on a strong role in guiding the economy to promote economic development. (such as <u>Nasser</u>'s promotion of economic development in Egypt or the encouragement of export-oriented economies in East Asia) At the end of the twentieth century, many governments encouraged free market economic policies and promoted economic liberalization. (such as the United States beginning with Ronald Reagan, Britain under Margaret Thatcher, or China under Deng Xiaoping) States, communities and individuals became increasingly interdependent, a process facilitated by the growth of international organizations. New international organizations (such as the <u>League of Nations</u> or the <u>United Nations</u>) formed to maintain world peace and to facilitate international cooperation.</p> <p>New economic institutions (such as the <u>IMF</u>, <u>World Bank</u> or <u>WTO</u>) sought to spread the principles and practices associated with free market economics throughout the world. <u>Humanitarian organizations</u> (such as <u>UNICEF</u>, the <u>Red Cross</u>, <u>Amnesty International</u>, <u>Doctors Without Borders</u> or the <u>WHO</u>) developed to respond to humanitarian crises throughout the world.</p> <p>Regional <u>trade agreements</u> (such as the <u>European Union</u>, <u>NAFTA</u>, <u>ASEAN</u> or <u>Mercosur</u>) created regional trading blocs designed to promote the movement of capital and goods across national borders. Multi-national corporations (such as <u>Royal-Dutch Shell</u>, <u>Coca-Cola</u> or <u>Sony</u>) began to challenge state authority and autonomy. Movements throughout the world <u>protested</u> the inequality of environmental and economic consequences of global integration.</p>	
<p>6.3.III What <u>new social and cultural ideologies</u> developed, and what were the <u>conse- quences and reactions</u> to these ideologies?</p> <p>6.3.III.A How did <u>communities of faith respond</u> to the rapid changes in the 20th century?</p>	<p>People conceptualized society and culture in new ways; some challenged old assumptions about race, class, gender and religion; often using new technologies to spread reconfigured traditions. The notion of human rights gained traction throughout the world. (such as the <u>UN Declaration of Human Rights</u> or the end of the <u>White Australia Policy</u>) Increased interactions among diverse peoples sometimes led to the formation of <u>new cultural identities</u> (such as <u>negritude</u>) and exclusionary reactions. (such as <u>xenophobia</u>, <u>race riots</u> or <u>citizenship restrictions</u>)</p> <p>Believers developed new forms of spirituality (such as <u>New Age Religions</u>, <u>Hare Krishna</u> or <u>Falun Gong</u>) and chose to emphasize particular aspects of practice within existing faiths and apply them to political issues (such as <u>fundamentalist movements</u> and <u>Liberation Theology</u>)</p>	

**Period #6: Accelerating Global Change and Realignment, c. 1900 C.E. - Present**  
**Key Concepts - Study Guide**

<p>6.3.IV How did the <u>global nature of culture</u> affect sports, music, fashions, and the arts?</p>	<p>Popular and Consumer Culture became global. Sport was more widely practiced and reflected national and social aspirations. (such as <u>World Cup soccer</u>, the <u>Olympics</u> or <u>cricket</u>) Changes in communication and transportation technology enabled the widespread diffusion of music and film. (such as <u>reggae</u> or <u>Bollywood</u>)</p>
